

From the Dr. Seuss series:

Clam-I-AM! About the Beach

ISBN: 9780375822803

Retail: \$9.99

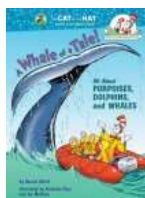

Author: Tish Rabe,

Illustrator: Aristides Ruiz

Publisher: Random House

Pub Date: 2005, Format: HC

Norval the Fish is hosting a seaside talkshow for the Fish Channel—and the Cat in the Hat and Thing One and Thing Two are Cameracat and Crew! Among Norval’s special guests are his old friend Clam-I-Am (a shy gal who lives in the sand and likes to spit), along with horseshoe and hermit crabs, jellyfish, sand fleas, starfish, seagulls, and miscellaneous mollusks. Seaweed, seaglass, tides, tidal pools, dunes, driftwood, and waves make cameo appearances, too. *Warning: Beginning readers are apt to be swept away!*

**Whale of a Tale!
All About Porpoises, Dolphins,
and Whales**

ISBN: 9780375822797 Retail:

\$9.99

Author: Bonnie Worth,

Illustrator: Aristides Ruiz

Publisher: Random House

Pub Date 2006, Format: HC

Onboard a vessel that would make Jacques Cousteau green with envy, the Cat and Co. take to the high seas in search of whales, dolphins, and porpoises—those aquatic mammals known as cetaceans. While learning how cetaceans stay warm without hair, have teeth or baleen, swim in troops, spyhop, spin, breach, and see via ecolocation, kids are introduced to almost 20 different species. A shipshape selection for summer reading!

DK Eyewitness: Shark

ISBN: 9781465426154,

Publisher: DK Publishing

Author/Editor: Miranda

MacQuitty

Retail: \$9.99, Format: SC,

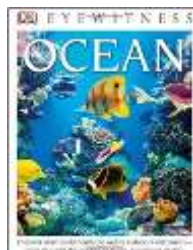

Pub Date: August 18, 2014

This updated edition

of *Eyewitness: Shark* is an in-depth look at some of the most fascinating and mysterious creatures in the ocean — from the gracious sting ray to the voracious great white.

Vivid photographs of various shark breeds including hammerheads, angel sharks, horn sharks, and more combine with informative text highlighting shark artifacts, stories of shark attacks, how a shark detects its prey and more, offering a close-up look at one of the most awesome animals on the planet, their behavior and secret underwater lives.

The introduction of paperback editions, eye-catching jackets, and updated interiors ensure that the *Eyewitness* series will continue to be relevant in the ever-changing world of education and remain the go-to source for homework help, research projects, reluctant readers, ESL students, and, as always, to satisfy the minds of curious kids.

Gulf of California Coastal Ecology: Insights from the Present and Patterns from the Past

ISBN 9781941384183, Retail: \$19.95
 Author: Markes E. Johnson and Jorge Ledesma-Vázquez

Publisher: Sunbelt Publications
 Pub date: 1/16, Format: SC, 8 ½ x11, 148 pages
 This handbook on ecology and paleoecology is infused with insights on the origins and development of Mexico's Sea of Cortés during a span of more than 12 million years. It makes the connection between a beautiful shell washed onto a beach with the discovery of the same or a similar fossil shell from a nearby limestone cliff. The concept of natural history appears less often in increasingly specialized literature, nowadays, failing to draw a connection between the present and the distant past. This book makes the connection and brings the past alive. It deals with multiple and interlocking ecosystems and their fossil counterparts, providing a holistic overview on geography, ecology, and geology. Students, scholars, and outdoor enthusiasts of all kinds will find this guide an indispensable resource for exploration of virtually any stretch of coastline on the Gulf of California.

As an added bonus, practical information is given for those who wish to visit the featured lighthouses for themselves . . . if they dare.

Great Migrations Whales (National Geographic)

Written by Laura Marsh
Trade Paperback: \$3.99
Hardcover Library Binding: \$13.90
On Sale: October 12, 2010
Pages: 48 | ISBN: 978-1-4263-0745-4

Over the course of their 70-year lifespan, sperm whales will easily travel the circumference of the Earth in search of food and the need to breed and find a mate. Males will travel as far north as the Bering Sea and as far south as Antarctica in order to find enough food to sustain their ways of live—up to 700 squid a day! Along the way, these massive beasts battle 30-foot-long giant squids, and each other, to sustain their ways of life.

With its awesome facts and action-packed images, this book brings kids close to the mysterious lives of sharks.

SEA OF CORTEZ

ISBN: 9780143117216 Retail: \$25.00

Publisher: GIBBS SMITH BOOKS

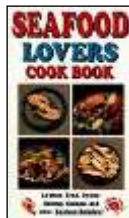

Author: John Steinbeck, Edward F. Ricketts

PUB DATE 7/09, Format: SC

The collaboration of two friends—one a novelist, one a marine biologist—produced a volume in which fascinating popular science is woven into a narrative of man’s dreams, his ideals, and his accomplishments through the centuries. Sea of Cortez is one of those rare books that are all things to all readers. Actually the record of a brief collecting expedition in the lonely Gulf of California, it will be science to the scientist, philosophy to the philosopher, and to the average man an adventure in living and thinking.

The teeming and wildly competitive world of the sand flats is seen in terms of history, politics, ethics, and sociology; a starfish is important, not only because it is a new variety, but because it is essential to the delicate balance of the whole region in which it is found. Steinbeck and Ricketts are the opposite of “pure” scientists: it is not only their work that fascinates them, but the complicated and enormously exciting implications of that work.

Sea of Cortez is a book to be read and remembered on two levels. It is a journey through a remote and beautiful corner of the world, a diary filled with the daily excitements and triumphs of skillful and energetic men. It is also an invitation to see the world anew from a fresh vantage point and perhaps with a broader and more understanding spirit.
