

# New Interpretive Coloring Books!

The *Color & Learn* series from Sunbelt Publications will help you learn as you add color and create your very own piece of artwork. Every book features interpretive information for each engaging line drawing. Choose from a variety of unique subjects. Take a look at the newest titles in the series.

## *Coloring Lizards, Snakes, and More: Southern California*

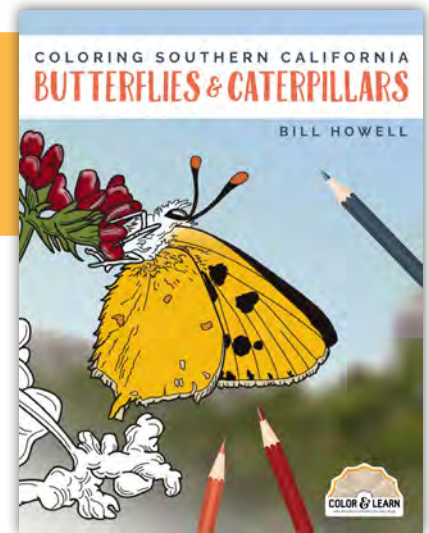

Dr. Bradford Hollingsworth  
9781941384558 | \$9.95  
Release Date: November 2019

This book has 40 amphibian and reptile species from southern California including frogs, salamanders, lizards, snakes and turtles. The book includes the common and scientific name of each, where the species can be found, its food preferences, and interesting facts about its natural history. Each illustration has a corresponding color photograph. The coloring pages provide an introduction to the diverse body forms and lifestyles these animals display and help in species identification.

## *Coloring Southern California Butterflies and Caterpillars*

Bill Howell  
9781941384596 | \$10.95  
Release Date: Fall 2020

This book illustrates 37 different butterflies, several caterpillars, and two moths with color photos to teach the actual color scheme of each. You can learn the differences between a butterfly and a moth in the in-depth descriptions which include the common name, scientific name, and wingspan of each species. Learn about rare and at risk species found in southern California, such as the Hermes Copper that is essentially endemic to San Diego County and is depicted on the front cover of this book.
